Hi Deke and Corrin!

I hope you two are doing well! I do believe the photo in the EIR and Tom's photo are taken from different places (EIR photo taken from further back). See the cars parked and the curb cut on the left. To really compare, photos should be taken from the same place.

The County has considered the requests from interested members of the public for a 15-day extension of the scheduled June 17, 2021 close of the public review period for the Highland Estates EIR Addendum. The request has been granted to allow the public more time to review the EIR Addendum and appendices, with the County's decision on the project modification request to be made after July 2, 2021.

Stay cool!

We oppose these project changes ! Build it only as approved !

The FEIR said house 11 would look like this attached photo and that there would not be an impact. Do you think these pictures of house 11 match? There needs to be new EIR review on this newly discovered significant impact!

Chamberlain has learned this lesson well !

The Original EIR said the project was not habitat for white tailed kite but here is a picture and it actually is its habitat and needs to be reviewed in a supplemental EIR (pic attached)

We miss our kites. All we have now are rats, gophers and snakes. Not good for our children. I have to check for snakes every time I go out to my garage.

The amount of grading is more than doubling from what was originally approved. This is not a minor modification by any standard!

Our streets and sidewalks have cracked and eroded. The tile in our house has cracked as well as the front driveway.

If Chamberlain continues to ignore these things by grading without concerns for the neighborhood we will have to bring suit.

If the radiant heat fails on Cobblehill there will be trouble !!!!

Please look at the original plans and have Chamberlain adhere to them and not
